ABOUT US

Charles River Community Health’s mission is to improve the health and well-being of the communities of Allston, Brighton, Waltham, and surrounding areas by providing quality, comprehensive, coordinated care that is patient-centered, family friendly, and community focused.

As a Patient Centered Medical Home, we are committed to providing patients with timely access to the right care, at the right place and at the right time, collaborating with other organizations to connect patients with a comprehensive range of services and provide continuity of care, and creating new community partnerships to meet the changing needs of patients and the community.

We value caring for everyone with dignity, respect, and compassion, reducing cultural, financial and other barriers to care, and eliminating health care disparities for our patients. We also advocate for the needs of our patients, the community, and public health causes.

CEO'S MESSAGE

It would be an understatement to say 2020 brought unprecedented changes and challenges for us all. As a community health center, we felt the effects of the COVID-19 pandemic deeply, and took on the challenge to reimagine how we deliver safe, essential health care services and also meet our patients’ significantly increased social needs, especially food insecurity.

Our extraordinary staff rose to the occasion, adjusted and learned how to continue serving patients via telehealth when possible and in a safe manner when in-person visits were necessary. We increased our scope of services to provide COVID-19 testing and vaccinations to patients as well as members of the Allston-Brighton, Waltham, and surrounding communities. Generous individuals, community partners, board members, and elected officials have been incredible, providing financial support, donating masks and other Personal Protective Equipment, donating lunches to our staff, and giving the gift of their time by hand writing thank you notes to staff, and volunteering at our monthly mobile food market and now COVID vaccine clinics. As a result, we were able to continue serving tens of thousands of patients and community members this year in fulfillment of our mission.

Bearing in mind the unusual nature of this year, we felt this Annual Report needed to be different. We wanted to showcase the ways our devoted staff creatively and compassionately adapted their practices in the face of the pandemic and thank the numerous supporters who stepped up to make our work possible during a year marked by change and uncertainty. While the financial data in this report is for our 2020 fiscal year July 1, 2019-June 30, 2020, much of the other content within focuses on the 2020 calendar year to give you a more current picture of our amazing accomplishments of this last year.

Despite the hardship the COVID-19 pandemic has brought to Charles River Community Health, we hope this Annual Report serves as a reminder of the power of community during difficult times. Thank you for being a part of our community.

With gratitude,

Elizabeth Browne
CEO

FINANCIAL INFORMATION

Fiscal Year July 1, 2019 - June 30, 2020
Total Operating Revenue: $18,302,336
Total Operating Expenses: $17,908,819
ADAPTING TO COVID-19

IN RESPONSE TO THE PANDEMIC, WE:

- Launched a community COVID testing program
- Retooled our facilities for patient and staff safety
- Provided telehealth medical and dental services
- Began vaccinating staff and community members against COVID-19
- Adapted mobile markets to include drive-up and socially distanced options

We performed 4,765 COVID tests.

19,737 appointments took place via telehealth.

More than 2,150 people received fresh food and groceries at our monthly mobile markets.

We began vaccinating staff in December of 2020 and community members shortly thereafter.
Throughout 2019 and 2020, we continued to offer monthly “Mobile Markets” in partnership with the Greater Boston Food Bank. These markets allow patients to obtain fresh food at no cost to them. Each Mobile Market typically served up to 150 local families, with this number doubling at the height of the pandemic as food insecurity became a concern for more of the families we serve. When the pandemic hit, we transitioned to contactless drive-through pickup, with a socially distanced walk-up option for those without access to cars.

In the fall of 2019, we began partnering with Fresh Truck, which brought fresh produce such as carrots, ginger, lettuce, mangos, and more at an affordable price. All Allston-Brighton community members were welcome to shop at Fresh Truck.
WHO WE SERVED

IN 2020, WE SERVED

13,538
PATIENTS

94%
LIVED AT OR BELOW 200% OF THE FEDERAL POVERTY LEVEL
($52,400/YEAR FOR A FAMILY OF FOUR)

In response to events throughout the United States and around the world, our Board of Directors affirmed its commitment to racial equity and justice and adopted the following resolution:

We, Charles River Community Health Board of Directors, on this day August 4, 2020, hereby recognize racism as a public health crisis and affirm our commitment to diversity, equity and inclusion.

We are committed to fighting racism and taking an active stance against structural racism to increase diversity, equity and inclusion through:

- Board representation that is racially and culturally diverse, and also considers being inclusive of other communities facing health inequities
- Understanding and overcoming our biases, in part through cultural humility and anti-racism education and training
- Advocating for policies that improve the health of communities of color and other communities facing health inequities
- Charging management to create a Diversity Equity and Inclusion Committee to:
  - Create a committee charter, goals, and performance metrics that will be reported with transparency and accountability
  - Promote policies, procedures, and practices that are inclusive and equitable for staff from all backgrounds
  - Advance the hiring, retention, and development of managers and staff who are racially and culturally diverse, as well as those from other communities facing health inequities
  - Promote contracting with diverse vendors
In the fall of 2020, we launched an internal Diversity, Equity, and Inclusion Committee. This staff-driven initiative includes staff members from across the organization and meets regularly to discuss ways to advance DEI at Charles River Community Health. The Committee’s mission statement reads as follows:

The DEI Committee works to remove all forms of systemic oppression affecting staff and patients. In doing so, our staff and employees will reach their full potential through growth opportunities and investments into their career development provided by CRCH. The committee is also dedicated to working towards ensuring that all CRCH patients will receive quality and equitable care regardless of their financial status, legal status, racial and ethnic backgrounds, gender identity, sexual orientation, and insurance coverage.

2020-21 Diversity, Equity, and Inclusion Committee

Beatriz Lopes, Community Health
Brendon Robinson, Behavioral Health
Lily Li, Finance

Mirna Vidal, Dental
Paul Kennedy, Medical Records
Yalena Jimenez, Pharmacy
Yvette Valderrama, Nursing
Due to the COVID pandemic, in 2020 we were unable to march in the annual Boston Pride Parade as we have in previous years. Instead, in July we hosted a virtual Pride Lunch for staff to come together, celebrate, and reinforce our commitment to welcoming all patients and staff. Staff were invited to create festive signs indicating what pride means to them, and to show their support for staff and patient members of the CRCH LGBTQ community.

In 2019 and 2020, we were again recognized as a Healthcare Equality Index Top Performer by the Human Rights Campaign.

The Health Care Equity Index (HEI) evaluates healthcare facilities' policies and practices related to the inclusion of LGBTQ patients, visitors, and employees.
Though the pandemic forced us to cancel some of our annual events, we were still able to host and attend a number of events to connect with community members, share vital information, and provide health screenings. Once we were able to safely resume some in-person patient care, the Dana-Farber Mammography Van (pictured above) visited CRCH’s Brighton and Waltham locations to help ensure patients continued to receive cancer screenings even during the pandemic. Other events included:

- On January 11, CRCH organized a health benefit day to assist patients with their health benefit applications. More than 120 patients attended.
- We hosted information tables at local community events to distribute information about breast and cervical cancers and the importance of getting an HPV vaccine. Events included the January 17 Waltham Chamber of Commerce meeting and the March 7 Parenting Awareness Conference at the McDevitt Middle School.
- On February 27, we visited Waltham Family School, a school that serves low-income English Language Learners and their families and assists them with their English skills. Staff passed out clinic flyers and provided blood pressure and cholesterol screenings and information on health benefits to teachers and students.
- On October 22, we collaborated with Chien-Chi Huang, Executive Director of Asian Women for Health, to host a webinar on breast health. The event, which was free and open to all, focused on breast cancer prevention. Huang also shared her personal experience as a breast cancer survivor.

While we continue to connect with patients virtually, in 2021 we hope to return to attending and hosting in-person events for our patients and members of the Allston-Brighton, Waltham, and surrounding communities.
Our work would not be possible without the generosity of our community partners and donors. We are grateful to the following individuals and companies for their financial support.
